THE NEWFOUNDLAND ALMANAC.

Eclipses, 1866.

In the year 1866, there will be *five Eclipses*, THREE of the SUN and TWO of the MOON, but of these, only TWO will be visible in this Island.

The first—a *partial Eclipse of the Sun*, March 16th, invisible in this Island, and will be seen only between the parallels of 44 and 82 North Latitude, and from 120 East to 77 West Longitude, that is, in the North Pacific Ocean, Siberia, &c.

The second—a *total Eclipse of the Moon*, March the 30th and 31st, visible in Newfoundland.

First contact with Penumbra, March 30th, at	9h 57m 11s p.m.	} Mean Time at St. John's, N.F.
First contact with Shadow	at 11h 7m 11s p.m.	
Beginning of total Phase	31st, at 0h 13m 35s a.m.	
Middle of Eclipse	at 1h 2m 29s a.m.	
End of total Phase	at 1h 51m 23s a.m.	
Last contact with Shadow	at 2h 57m 47s a.m.	
Last contact with Penumbra	at 4h 7m 47s a.m.	

As the Moon will rise about 6h. 21m. p.m. on the 30th, and set about 5h. 46m. a.m. on the 31st, she will consequently be on the Meridian, or due South, at midnight, and thus during the whole time of this Eclipse, the Moon can be seen with the greatest advantage, for although she will be totally deprived of light both from the Sun and the Earth, yet she will show a faint, dull red light, caused by the Sun's rays refracted by the Earth's atmosphere; so that if the weather be fine, and the atmosphere clear, this Eclipse will be an interesting phenomenon, especially to our hardy seal hunters.

The third—a *partial Eclipse of the Sun*, April the 14th, not visible in Newfoundland, and will be seen only in the Southern Ocean and in a part of Australia.

The fourth—a *total Eclipse of the Moon*, September 23rd and 24th, invisible in Newfoundland, as the Moon will be below our horizon during its continuance.

The fifth—a *partial Eclipse of the Sun*, October 8th, partly visible in Newfoundland.

Mean time of Sun and Moon's conjunction in Right Ascension, October 8th, at	0h 29m 28s p.m.	} Mean Time at St. John's.
Begins on the Earth generally, Oct. 8th, at	11h 21m 0s a.m.	
Greatest Eclipse	at 1h 13m 26s p.m.	
Ends on the Earth generally	at 3h 5m 56s p.m.	

This Eclipse will be visible between the parallels of 23.41 and 83.17 North Latitude, and from 14 East Longitude to 141.19 West of Greenwich.

The year 5627 of the Jewish Era commences on September 10, 1866.

Ramadan (Month of Abstinence observed by the Turks) commences on January 18, 1866.

The Year 1283 of the Mohammedan Era commences on May 16 1866.

The following Memorandum has been prepared by an intelligent Skipmaster for insertion in the Almanac, hoping that it may prove useful to the numerous and important class to which he belongs:—

“Mariners leaving Sydney, Cape Breton, bound to St. John’s, Newfoundland, should be very careful in the course they steer. The common course is E.S.E., but if the wind is S.S.W. the course should be S.E. instead of E.S.E., particularly after a N.E. or Northerly wind; that wind forces the water out of the Straits of Belle Isle so strong when the wind changes to the Southwest or South it relaxes back again, which causes a very strong current from the South running to the North, and hems the mariner in shore; the result is, his vessel is stranded or a total wreck before he knows where he is situated. I throw out this hint for Newfoundlanders in particular, as they generally keep too near the coast. Englishmen coming down adopt a better course from Sydney to St. John’s; they give Newfoundland a good berth until they pass Cape Race, then they haul in and make the front of the Island, which is a good plan, the safest coming from the Westward.”

JANUARY.—January (Latin *Januarius*) was so called by the Romans from Janus, one of their superior deities, to whom the first day of the year was sacred, and through whom they offered their prayers to the gods; hence the name is used to signify gate of the year. Janus was represented with two faces; one old and wrinkled, and looking backward; the other face young and smiling, and looking forward.

FEBRUARY.—February (Latin, *Februarius*) received its name from Februalia, a feast of sacrifices and purifications held by the Romans in this month, in the vain hope of being cleansed from the sins of the whole year. It corresponds to ADAR (Ezra vi. 15), the sixth civil, and twelfth sacred month of the Jews. By the Saxons it was called *Sproutkele*, as cabbages begin to sprout now; and also *Sol-monath*, the month when pancakes were offered to Sol, or the Sun.

MARCH.—March (Latin, *Martius*) was so named by the Romans in honor of Mars, their god of war. In this month the Gothic tribes went out on warlike expeditions. It answers to NISAN, or ABIB (Neh. ii. 1; Deut. xvi. 1), the seventh of the civil, and the first of the sacred year of the Jews. By the Saxons it was named *Hlyd-monath*, the loud or windy month.

OCTOBER.—October derives its name from the Latin word *octo*, "eight," indicating the place it held in the Roman calendar, and *imber*, or "shower." To the Jews it was known as *BUL*, signifying decay, as in the fall of the leaf (1 Kings, vi. 38), or *MARCHESVAN*, as it was called after the captivity.

Light Houses.

Fort Amherst Light at the entrance of St. John's—A Light was first established at this station in 1813; in 1850 a new House, Lantern and Apparatus were erected. The light burns at an elevation of 114 feet, is produced by a treble argand burner placed in the focus of an annular lens of the fourth order, and in favorable weather can be seen 16 nautical miles. When Cape Spear is enveloped in fog a heavy piece of ordnance is also discharged at this Fort every hour during day light, to assist vessels in making the harbor. It is situated in lat. 47.33.54 N., and long. 52.40.18 W. John Sheppard, Keeper; Austin Sheppard, Assistant.

Cape Spear Light—This Light was first exhibited on the 1st September, 1835; it is produced by seven argand burners and silvered reflectors burning at an elevation of 264 feet—it revolves, shewing a bright Light, every minute, and in favourable weather can be seen 26 nautical miles. It is situated in 47.31.11 N. lat., and 52.36.59 W. longitude. James Cantwell, Keeper; Denis Cantwell, Assistant.

Harbor Grace Island Light—First exhibited on the 21st November, 1836; it is a fixed Light, has fifteen argand burners and reflectors, shewing a steady bright light from N. to S. W. and by W. seaward, elevated above the level of the sea 151 feet, and can be seen in fair weather in rounding Cape St. Francis or crossing Conception Bay, on the intervening space between N. and S. W. and by W. 20 nautical miles; on the land side the light is more feeble. It is situated in lat. 47.42.45 N., and long. 53.8.15. Samuel Austin, Keeper; Charles Snow, Assistant.

Cape Bonavista Light—Situated in lat. 48.41.56 N., long. 53.5.20 W.; is a Revolving Light, shewing alternately every 90 seconds a white and red Light. It is produced by sixteen argand burners and reflectors, burns at an elevation above the sea of 150 feet, and in favorable weather can be seen 18 nautical miles. By keeping this Light open with Cape Largent, it will carry you clear of the Flower Rocks; first exhibited 11th September, 1843. Jeremiah White, Keeper; Nicholas White, Assistant.

Cape Pine Light—This tower is of iron, built by the Imperial Government in 1849-50, and first put in requisition on the 1st January, 1851. It is revolving, and shews a brisk flash every thirty seconds—has 12 argand burners and reflectors—elevated above the level of the sea 314 feet—situated in lat. 48.37.4 N., and in long. 53.31.45 W. In a favourable state of the atmosphere it can be seen 26 nautical miles. Henry Herder, Keeper; Thomas Doran, Assistant.

Harbor Grace Beach Beacon and Light—First exhibited 11th September, 1850; stands on the Point of Beach at the entrance of Harbour Grace. It is a double Light, as a distinction from Harbor Grace Island Light, one being placed above the other, preserving that appearance for six miles; exceeding this distance up to ten miles the two Lights appear blended into one. In sailing into Harbour Grace with a fair or leading wind, bring the Beach Beacon to bear W. or W. by S., and by keeping the Light or building a little on the starboard bow it will carry you clear of the Bar, on which at low water there is not more than 8 feet of water. It is situated in lat. 47.41.28 N., and in long. 53.12.33 W.; elevation above the sea level 40 feet; in clear weather it may be seen at a distance of 11 nautical miles. George Brown, Keeper.

Green Island Light, at the entrance of Catalina Harbor, Trinity Bay—Situated in lat. 48.30.16 N., long. 53.2.40 W. This a fixed white Light, burns at an elevation of 92 feet above high water, and in favourable weather will be seen from E.N.E., seaward, to S.W., 15 nautical miles. Vessels bound Northward by keeping this Light open with the North Head of Catalina until Bonavista Light opens.

with Cape LeJean, will give the Flowers Rocks an ample berth—or when coming from the Northward and bound for Catalina, by giving the N. Head a moderate berth, you will clear the Brandies Rocks by steering for Green Island Light. It was first exhibited in 1857. Patrick Houlahan, Keeper; William Houlahan, Assistant.

Cape Race Light—Exhibits a fixed white Light, from sunset to sunrise. The Light will be visible to seaward from N.E. by E. round by the S.E. and S. to W. The Light is elevated 180 feet above the mean water level of the sea, and may be seen in clear weather 19 nautical miles from a ship's deck. The tower is striped red and white vertically. It stands close to the old Beacon, which has been cut down. The Light house is in lat. 46.39.30 N., long. 53.4.30 W., and was first exhibited in 1856. William Hally, Keeper; George Hewett, Assistant.

Dodding Head, Great Burin Island Light—This Light was put in requisition on the 3rd August, 1858, and is exhibited every night from sunset to sunrise. It is revolving, catoptric of the second order, producing a brilliant white Light every minute, with intermediate flashes at intervals of twenty seconds, burning at an elevation of 430 feet above the level of the sea, and in favorable weather can be seen 29 miles—situated in 47.0.26 North Latitude, 55.8.43 West Longitude. Austin Oke, Keeper; John Churchwell, Assistant.

Offer Wadham Island Light—Was first exhibited on the 4th October, 1858, and is lighted every night from sunset to sunrise. The Light is a steady, fixed lens-light, burning on a circular Brick Tower 100 feet above the level of the sea, and can be seen in a favourable state of the atmosphere 15 nautical miles. Situated in Latitude 49.36.0 North—Longitude 53.45.6 West. Charles Power, Keeper; Peter Woods, Assistant.

Baccalieu Island Light—This light is exhibited every night from the going away of daylight in the evening to the return of daylight in the morning. The Light House is situated on the Northern end of the Island—Latitude 48.8.51 North, Longitude 52.47.50 West,—the tower is of brick, the keeper's dwelling a square building detached from the tower, painted white with the roof red.

The Light is a catoptric first class Holophotal revolving white Light, shewing a flash every twenty seconds. It is elevated 443 feet above high water, and can be seen in clear weather 30 nautical miles, and a lesser distance according to the state of the atmosphere. When the Southern end of the Island bears N.N.E. the Light will not be visible when nearer the Island than eight miles. It was first exhibited in 1858. James Ryan, Keeper; John Ryan, Assistant.

Cape St. Mary's Light—Was put in requisition on the 20th September, 1860; it is a revolving catoptric Light of the first order, producing alternately every minute a brilliant red and a white Light, burning at an elevation of 300 feet above the level of the sea, and will be seen in a favourable state of the atmosphere 26 nautical miles from a vessel's deck; situated in 46.49.30 N. lat., 54.41.34 West long. The tower is of brick, and on each side of

which stands the dwellings of the Keeper and Assistant, the sides of which are painted white, roofs red. John Reiley, Keeper; William J. Collins, Assistant.

St. John's.—Two red lights are exhibited every night from sunset until a rise, intended as leading marks for vessels entering the Narrows. The lower light on the roof of the Custom House—the other 400 yards in the rear, on a white post, within a few yards of the N.E. angle of the Congregational Church, and 180 feet above the level of the sea. These Lights will be readily distinguished from other lights in the town; and keeping them in a line bearing N.W. & W. will lead in the largest vessel clear of all danger. To serve as leading marks also during the day, the pediment of the Custom House has been painted white; this is to be kept in line with the upper lantern, also painted white. Exhibited 1st September, 1863.

Brunet Island Light, Mercer's Head, Fortune Bay.—First exhibited 27th June, 1865. It is a powerful, flashing white Light and attains its greatest brilliancy every ten seconds. It burns at an elevation of 408 feet above the level of the sea, and in clear weather may be seen at a distance of 35 miles, and be visible in every direction from North, round East and South, to W.N.W. Mercer's Head is a bold headland, and situated in long. 55.59.30 W., and lat. 47.16 N. Martin Sparrow, Keeper; James Gaulton, Assistant.

Galantry Head, Island of St. Peter's.—The Fixed Light on Galantry Head, (Island of St. Peter's,) since the 10th August, 1862, has been replaced by a Flash Light, with intervals of twenty seconds, and by one red flash after two white flashes; situated in lat. 46.45.30 N., long. 58.27.0 W. Elevation above high water 64 metres. Distance at which the Light is visible 18 miles. The Light is hidden at the Northward by the highland of St. Peter's.

Light at the South entrance St. Peter's.—Since 1st October, 1862, the entrance of the harbor of St. Peter's, called South Channel, has been marked by two small Fixed Lights, one of which is a white Light illuminating three-fourths of the horizon, and placed on the Battery—and the other a red Light, on the plain at the North of the town. The white Light has an elevation of 11 metres, and is visible six miles. The red Light is elevated 19 metres, visible 3 miles distance. The line connecting these two lights indicates the Middle Channel.

The position of the red Light has also been so determined that as soon as it is seen on the left of Cape Eagle, vessels coming from Columbian in beating into the N.E. entrance will have nothing to fear from the shoals of Cape Rouge.

Robert Oke, General Inspector of Light Houses.

Light Dues.—One Shilling per ton on all vessels entering any port or harbor of the Colony, except coasting, sealing, or fishing vessels; but not to be levied more than once in any one year. Sealing and coasting vessels.—Sixpence per ton on registered vessels of 40 tons and upwards; Fifteen Shillings per annum on all vessels less than 40 tons.

MONEY ORDER BRANCH.

James Healy, Superintendent.

Office hours from 9 a.m. to 4 p.m.

Money Orders are now interchanged with the United Kingdom and Canada, at the following rates of Commission :—

Scale for United Kingdom—Orders up to £2 stg., 1s. stg.; from £2, up to £5, 2s.; from £5, up to £7, 3s.; from £7 up to £10, 4s.

Scale for Canada—Orders up to £5, 1s.; from £5 to £10 2s. No single Order can be granted for more than £10. No half-pence to be introduced in the orders.

SYSTEM.

1—Money Orders are made out in forms supplied for the use of the Money Order Offices.

2—Persons applying for Money Orders are recommended to use printed "Application Forms" printed for that purpose.

3—Place of payment of a Money Order may be changed in accordance with instructions provided therefor.

4—Alteration of payee's name may be effected, by issue of a new order and payment of commission thereon.

5—Applicants for Money Orders are expected to observe due care in the examination of the same, relative to filling and stamping; defect in Orders, when presented for payment, may cause difficulty and delay, for which the paying Office is not to be held accountable.

6—Postmasters should be particularly careful to obtain from the person who presents a Money Order, whether the rightful owner or not, full information as to the Christian name, surname and address, of the party who originally obtained it, unless such party be a firm, when the name of the firm will suffice. *The only exception to this rule is—*When an Order is presented through a Bank, in which case it will suffice that the order, being properly signed, be also crossed with the Banker's name.

7—As, however, *after once paying a Money Order, by whomsoever presented, the Office will not be liable to any further claim, the public are strictly cautioned,—*

1st—To take all means to prevent the loss of the Money Order.

2nd—To be careful, on taking out an Order, to state correctly the Christian as well as the surname of the person in whose favor it is to be drawn.

3rd—to see that the name of the person taking out the Money Order is correctly known to the person in whose favor it is drawn.

8—Payment of a Money Order must be obtained before the end of the sixth calendar month after that in which it was issued, otherwise a new order will be necessary, for which a second commission will be charged; and if the order be not paid before the twelfth calendar month after that in which it was issued, all claims to the money will be lost.

Neglect of the foregoing instructions will risk the loss of the money, besides leading to delay and trouble in obtaining payment.

The Money Order Offices in Newfoundland, at present, are: General Post Office, St. John's; Post Offices at Bay Bulls, Bonaville, Brigus, Burgeo, Burin, Carbonear, Ferryland, Fogo, Greenspond, Harbor Breton, Harbor Grace, Placentia, Trepassy, Trinity, Twillingate.

9—Postmasters should recommend the use of Money Orders for the transmission of money, in preference to such transmission otherwise.

The Census of the Labrador was cursorily taken by the late Superintendent of Fisheries (James L. Prendergast, Esquire,) in 1856 and 1857, but it is not sufficiently correct or full to form a part of the foregoing Returns. The number of permanent residents, as given by that gentleman, from L'Anse Sablon to Sandwich Bay, both inclusive, including Belle Isle, is 1650, of whom 1351 are Protestants and 319 Catholics.
